SUMMARY

MarTech Engineer with a background spanning analytics engineering, workflow automation, and full-stack development. Contract MarTech engineer for KÜHL since December 2024 through MBK Consulting Group, and the primary engineer for client and server-side tagging and consent: server-side Google Tag Manager on Stape, Meta Conversions API and Google Ads server-side tags, Consent Mode v2 and OneTrust, GA4 event specs, and Looker Studio reporting on BigQuery, with AI-assisted development and automation workflows. Background also spans mobile and web development and applied AI tooling, alongside a BCAD in Application Development.

SKILLS

ANALYTICS & MARTECH: Google Analytics (GA4), Google Tag Manager (client + server-side), Google Ads, BigQuery (SQL analysis & reporting), Looker Studio, Consent Mode v2, Microsoft Clarity, Meta Business Suite, Bazaarvoice, Statistical Data Analysis

AUTOMATION & AI: n8n, MCP integrations, Claude API, Claude Code, AI Fluency Framework & Foundations

DEVELOPMENT: JavaScript (ES5/ES6+), TypeScript, React.js, React Native, Tailwind CSS, Kotlin, SQL, PostgreSQL, Python, Full-Stack Development, Back-End Web Development

INFRASTRUCTURE & TOOLS: Docker, Tailscale, Obsidian, Microsoft Azure, Firebase, Supabase, GitHub, Jira (Atlassian), Linear, Notion, Strapi CMS, Internal Admin & CMS System Integration

EXPERIENCE

Contract MarTech Engineer, KÜHL — via MBK Consulting Group

December 2024 – Present

Independent contractor · Remote · KÜHL is a client of MBK Consulting Group

- Authored 249 production GTM releases across web and server-side containers since January 2025 (over 80% of all releases)
- Wrote the server-side GTM audit and led the fixes, including Meta CAPI deduplication and consent gating
- Took web tags with Consent Mode v2 consent checks from zero to about a third of the container
- Nearly doubled the server-side event streams feeding the warehouse
- Built 4 n8n automations, including a product-page content pipeline with human review
- Build and publish changes across client-side and server-side Google Tag Manager, routing events from the dataLayer through server-side data client tags for platform-specific handling
- Write the GA4 event specs that BigQuery tables are built from, and build Looker Studio reports on top for attribution and channel-level reporting
- Implement Meta Conversions API and Google Ads server-side tags with deduplication and parameter passthrough to improve event match quality
- Manage consent configuration across CCPA and GDPR requirements using OneTrust and Google Consent Mode
- Contributed to an internal privacy scanner (headless scanning, report delivery, AI-generated reports)
- Implemented Microsoft Clarity session recording through the tag management layer (element labeling, funnels), and designed dataLayer tracking for on-site recommendation modules (placement- and utilization-level reporting)
- Diagnose discrepancies between client-side and server-side event counts, investigate GA4 event-volume anomalies, and maintain tag, trigger and variable hygiene across a high-volume GTM container
- Translate stakeholder reporting needs into tracking specs and document tracking architecture; work in GitHub, Linear and Jira, with Claude, Claude Code and MCP integrations (connecting Claude to Linear and n8n)

PROJECTS

Server-Side Tracking

KÜHL (client) · GTM (server-side) · Stape · December 2024 – Present
Extended server-side event routing on Stape, nearly doubling the server-side event streams that feed reporting, with deduplication and consent gating on the ad-platform tags.

Conversions API Deduplication

KÜHL (client) · Meta CAPI · December 2024 – Present
Server-side conversion event delivery to Meta with browser/server deduplication and event-match parameter passthrough across the funnel.

Utah Mountain Lion Conservation

Postcard Campaign · Wix Studio · Velo · Geocodio
Legislator lookup and postcard-generation tool for a public advocacy campaign: address-to-district resolution with Geocodio, mobile-optimized embed built with Velo page code.

Attribution Reporting

KÜHL (client) · GA4 · BigQuery · Looker Studio · December 2024 – Present
Wrote the GA4 event specs behind the attribution tables and built Looker Studio reporting on top, surfacing channel-level performance alongside platform-native reporting.

Consent & Privacy

KÜHL (client) · OneTrust · Google Consent Mode · December 2024 – Present
Geolocation-based consent rule logic and consent-state propagation into the tag layer.

Ingot — Budget Tracker

University project · Kotlin · Firebase · MPAndroidChart · 2026
Android budget tracker with receipt capture, category budgets, savings goals, spending charts and XP-based gamification to build budgeting habits.

EDUCATION

Emeris (formerly IIE Varsity College): BCAD in Application Development (Bachelor of Computer and Information Sciences), completing 2026; Higher Certificate in Mobile Application and Web Development, 2023, with distinction
